Here's a look at some of the Star titles, among the hundreds yet to be announced, that will be available from 23 February on Disney+…

Big Sky
Star Original

From visionary storyteller David E. Kelley (*Big Little Lies*) comes *Big Sky,* an intense thriller that follows private detectives Cassie Dewell and Cody Hoyt as they join forces with his estranged wife and ex-cop, Jenny Hoyt, to search for two sisters who have been kidnapped by a truck driver on a remote highway in Montana. But when they discover that these are not the only girls who have disappeared in the area, they must race against the clock to find the women before it's too late.

Love, Victor
Star Original

From the creators of *Love, Simon* and inspired by the hit film, the series follows Victor, a new student at Creekwood High School on his own journey of self-discovery, facing challenges at home, adjusting to a new city, and struggling with his sexual orientation. When it all seems too much, he reaches out to Simon to help him navigate the ups and downs of high school.

Prison Break

Michael Scofield (Wentworth Miller) is a desperate man in a desperate situation. His brother, Lincoln Burrows (Dominic Purcell), is on death row and scheduled to die in a few months for an assassination Michael is convinced Lincoln did not commit. With no other options and time winding down, Michael holds up a bank to get himself incarcerated alongside his brother in Fox River State Penitentiary. *Prison Break* combines the hope of *The Shawshank Redemption*, the camaraderie of *The Longest Yard* and the tense procedure and spectacle of *The Great Escape.* This intriguing series reveals additional pieces of the puzzle each episode as Michael carries out his daring plan to mastermind the ultimate prison break – and solve the far-reaching national-scale conspiracy that landed his brother there in the first place.

The X-Files

Unconventional FBI agent, Fox Mulder (David Duchovny), takes it upon himself to investigate a group of unsolved cases, known as the "X-Files," that he believes involve paranormal phenomena. To keep tabs on his work--and in the hopes of debunking his theories--the FBI teams him up with Dana Scully (Gillian Anderson), a young, skeptical agent who has a degree in medicine and a strong bias toward the scientific. As the pair works to solve these unexplained cases, Mulder's strong belief in the forces of the unknown continues to challenge Scully's rational mind. Their relationship grows more complex with each case, slowly emerging as a heady mix of professional competitiveness, witty repartee, and a mutual attraction that is heightened by the intensity of their tasks and the close proximity in which they work.

Lost

Mysteries abound as the 48 survivors of Oceanic Air Flight 815 find themselves stranded on an unidentified island with little hope of rescue.

24

Kiefer Sutherland stars in this precedent-setting television series where the entire season takes place in one day, with each of the 24 episodes covering one hour, told in real time.

Desperate Housewives

Looking down on her friends and family is a way of death for Mary Alice after she took her own life in her perfect house. Now, from beyond the grave, she takes us into the lives of her friends and neighbours: Susan is a divorcee and single

How I Met Your Mother

How I Met Your Mother is a comedy about Ted (Josh Radnor) and how he fell in love. It all started when Ted's best friend, Marshall (Jason Segel), dropped the bombshell that he was going to propose to his long-time

mom who will go to any length for love; Lynette is an ex-career woman who traded the boardroom for boredom and mania as the mother of four unmanageable kids; Bree Van De Kamp is like Martha Stewart on steroids, with a family on the verge of mutiny; Gabrielle Solis is an ex-model with a rich husband and a big house, so what is she doing with the 17-year-old gardener? And serial divorcee Edie Britt's conquests have everyone buzzing. Mary Alice is planning to share the secrets that hide behind every door in this seemingly perfect American suburb.

girlfriend, and now wife, Lily (Alyson Hannigan), a kindergarten teacher. At that moment, Ted realized that he had better get a move on if he too hopes to find true love. Helping him in his quest is Barney (Neil Patrick Harris), a friend with endless, sometimes outrageous opinions, a penchant for suits and a foolproof way to meet women. When Ted met Robin (Cobie Smulders), it was love at first sight, but when things didn't work out, Ted realized destiny must have something else in store. The series is narrated through flashbacks from the future.

Atlanta

Atlanta revolves around Earnest "Earn" Marks (Donald Glover), a loner who returns to his hometown of Atlanta, Georgia (The Peach State) after dropping out of Princeton. Upon his arrival, he discovers his cousin Alfred has become Atlanta's hottest new rap act. The show follows the cousins on their way up through the Atlanta rap scene, where their opposing views on art, commerce, success, and race will make their quest anything but easy. Earn is extremely smart, observant, and lost. As a disillusioned millennial, he struggles to find his calling or "brand" and feels that the game of life is fixed so that he can never win. He recognises that Alfred's overnight YouTube popularity has the potential to become a life changing opportunity for them both - if he can reign in his cousin's "act first, think later" attitude and get used to his drug-addled, possibly psychic (but definitely odd) sidekick Darius. As Alfred's manager, Earn may finally find something to which it's worth committing his energies.

Black-ish

Like any parents, Andre "Dre" (Anthony Anderson) and Rainbow (Tracee Ellis Ross) Johnson want to give their children the best. But their offspring's childhood is turning out to be much different than theirs. They now realize at least two things: there is a price to pay for giving their children more than what they ever had, and these loving parents are totally unprepared for the fallout. "Pops" (Laurence Fishburne), Dre's dad, takes every opportunity to offer his old school opinion on family issues.

Parental Controls

To make sure Disney+ is suitable for audiences of all ages, parental controls will separate me-time from family time on the entire platform. The app will include easy-to-use parental controls enabling the family-friendly experience parents expect. Available from 23rd February.

Customers will be able to set access limits on mature content, and create PIN-protected profiles to keep the kids safe, and give parents peace of mind.

Disney+ continues to expand entertainment across all brands

Coming next month is Disney's *Flora & Ulysses* - a delightful comedy-adventure based on the Newberry Award-winning book about 10-year old Flora, an avid comic book fan and a self-avowed cynic, whose parents have recently separated. After rescuing a squirrel she names Ulysses, Flora is amazed to discover he possesses unique superhero powers which take them on an adventure of humorous complications that ultimately change Flora's life - and her outlook - forever...
