

Cutting is intended for grown ups. If you're making a colour in bow, have your child colour it in before you cut it out. Cut out the bow. Fold it together back-to-back and use glue to affix the two sides together.

To make a hair accessory for girls, fold up the tab and thread a ribbon or hairband through it before gluing or taping the tab down.

To make a bowtie for boys, fold up the tab and use a paperclip to affix it to a shirt collar or buttonhole.

Caution when applying bows.
