

GUP-X

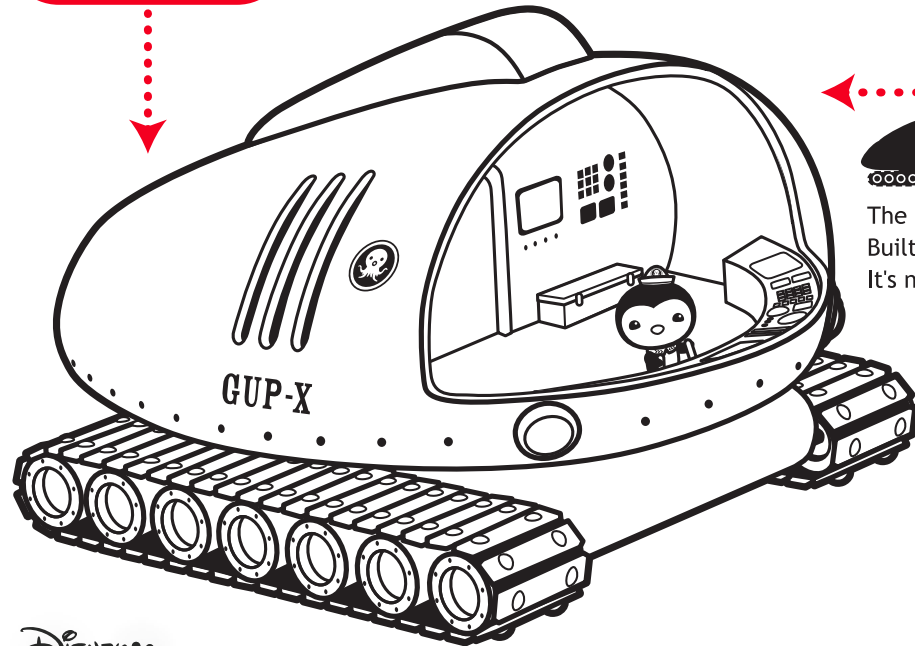

The GUP-X is the biggest GUP yet! Built to look like a horseshoe crab. It's actually 3 GUPs in one!

1

GLIDER

The front end of the Gup-X becomes a Glider - which can soar beneath or above the waves!

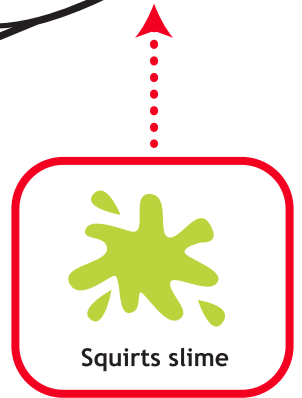

2

TANK

The middle section of the Gup-X is a super-tough tank! Built to make it through a rockslide (or a test drive by Kwazii!) It's not fast but it can crawl over any undersea surface!

3

SKI

The "tail" end of the Gup-X becomes the awesome Octo-Ski! This lil' Gup can speed underwater or on the ocean surface!
